# Nightmares arise

As the centuries have passed  
People working really hard  
People died and people guessed  
They have never been so far in space  
Far in space  
Far in space  
So far  
Crowded planet where we live  
Calmly waiting for relief  
Never left our lovely home  
We have never been alone in space  
Alone in space  
Alone in space  
Alone

It may seem strange for a first time  
But now you realise  
Creeping creatures are alive  
Fallen from space  
Children of vice  
They have  
Venomous fangs  
Multiple eyes  
Hellish wings  
Covered with flies  
Wicked brains  
Souls full of lies  
Nightmares arise

As the sun lights up the trees  
Your new fears will be released  
Every person has to hear  
Of the heralds  
Of your tears  
Of your tears  
Of your tears  
You cried  
All your words fall on deaf ears  
Everyone else are ignorant pigs  
What if people could believe  
That their nemeses  
Stalk so near  
Walk so near  
Stalk so near  
You hear their steps

The scariest creatures of this universe  
Reach to you to share their knowledge  
The prophecy chose you  
Upon your birth  
To spread the sacred source  
Of human fears  
Now you believe  
Your nightmares  
Are the key

# Sleepless nights

Sleepless nights  
Daydreams arise  
Sleepless weeks  
Days play hide and seek  
No one will hear  
How you disappear  
No one will hear  
A little squeak  
Dragging yourself to the bedroom, friend  
Wishing for only one thing to come true

Images in mirrors  
That appear  
To be gloom

Came to a misunderstanding  
With the eyes on the other side  
Gazing silently in the abyss  
Not a single thing is left to hide  
Lying in your cosy bathroom, friend  
Pray to God to fall asleep

Images in mirrors  
That appear  
To be gloom

Six five four three  
To one, who's done  
Tired of his reflection  
Taking out its gun  
Goodnight sleepwalker  
Goodnight, sleep!

# Fatal bounds

Fish in the sea of doubts  
Your thoughts cry out loud  
That you ain't the one to be found  
On the countless photos of plastic dolls  
Glimmering lights of a town  
Where you lost your stable ground  
And even a chambered round  
Won't tell you who you are

Irony, pain,  
Loneliness, fear  
Close the ring  
Around  
Everything seems  
So unclear  
You reach the  
Fatal bounds  
Fatal bounds  
Fatal bounds

Back in your family home  
Thousand nights it kept you warm  
Reunion washes the foam  
Of pathos, glamour and sarcastic mold  
Memories chill the heat,  
But the remedy fails to defeat  
Spectre that was born,  
In her fragile maiden form

Irony, pain,  
Loneliness, fear  
Close the ring  
Around  
Everything seems  
So unclear  
You reach the  
Fatal bounds  
Fatal bounds  
Fatal bounds

Oh  
Oh baby come on  
Baby come on darling

# Lost in the woods

Leaves dancing in circles  
Birds hiding in skies  
Trees among us  
Soil accepts the wise  
What is the root of evil?  
Who's planting the seeds to rise?  
This puzzle will never be complete  
One's searching for advice

Hearing voices  
Watching cartoons  
We are lost in the woods  
In the woods  
Mumbling voices  
Shiny pictures  
We are out of this woods  
Out of this woods  
In the woods  
Out of this woods  
In the woods  
Out of this woods  
In the woods

Girls dancing in circles  
Boys hiding in skies  
Here the whisper of nature  
Changes humans lives  
Old oak can prove you wrong  
Seen many deaths beside  
Can teach you to not break the silence  
Knowledge to memorize

Hearing voices  
Watching cartoons  
We are lost in the woods  
In the woods  
Mumbling voices  
Shiny pictures  
We are out of this woods  
Out of this woods  
In the woods  
Out of this woods  
In the woods  
Out of this woods  
In the woods

# Curtains closed

I've lost my brothers  
In the snow-white mob  
A piece of glass  
It is my last resort  
Please, dear silver  
Can you take me home  
In tiny boiling ocean  
We dissolve  
We dissolve

Curtains closed

My liquid body  
Gets a rapid flow  
I'll be buried with care  
Under a pale cloth  
Hey! What are you looking at me  
With your peeping eye?  
I'm gonna take you high  
Into the sky

See me in the sky

Before the dreaming  
I want to tell the truth  
Your present feelings  
Are the only proof  
That rotten existence  
Never needed you  
Now you're a ray of sunshine  
Reflected in the ocean's blue

Curtains closed  
See me in the sky

China white  
All night party  
Leaving spots  
Of our precious time  
Never bothered  
By luck or loathing  
Just a junkies ready to fall

Perception heated to extreme  
Completely swallowed by dream  
The path you should not ever follow  
Not single chance to compromise  
Inside my head I wanna rise  
To ride a devil's coaster  
Top to bottom  
Sugar dust  
Sweet missile  
Sparkling fuel for my bones  
Hug me tight my  
Adorable rival  
Buzzing in pacific tone

China white  
All night party  
Leaving spots  
Of our precious time  
Never bothered  
By luck or loathing  
Just a junkies ready to fall

I'm on a roll  
Just a junkie ready to fall

# System in system

As we stride and roam along the shore  
To please our mother's will  
We all are parts of the master plan  
It's written in our cells  
All the erring sons who slow the run  
They have to know a thing  
The more we impart unto the young  
The more we will receive

Spread my word  
Around the world  
Lend an ear to listen  
The more ideas will find their birth  
The faster we will build the system  
In system in system in system

Noble knights will fight  
For Queen's delight  
Drowned in battle trance  
As spears strike  
And horses fall  
Death will hit the call  
Their souls will fly  
Over time  
But rules will never bent  
The more we take from father's hand  
The faster we'll ascend

Spread my word  
Around the world  
Lend an ear to listen  
The more we try to realise  
The deeper we fall in the system  
In system in system in system

Parts of a mechanism  
Breeding bacteria  
Multiplying forms of light  
When will we finally define true criteria  
By which we all survive

# Mother

Oh can you please forgive me  
For all the filth you take  
For all the bloodspits on your carpet  
For all the mess I've made  
And when my week betrays me  
You call me just to say that you care  
You always told me that the people  
Are the creatures to beware

You opened my eyes on simple things  
You let my senses unwind  
You protected me from dark and harm  
I will always be sleeping in your arms  
In your arms

Oh can you please forgive me  
For all the lies you've heard  
For all the promises I've broken  
For every crusty word  
And when the most forsake me  
You heal me with a sincere hugs  
You always told me that the one's I love  
Should be kept inside my heart

You opened my eyes on simple things  
You let my senses unwind  
You protected me from dark and harm  
I will always be sleeping in your arms  
In your arms

Flowers all around me  
They capture my eyes  
Flowers all around me  
They torture my body  
Every teardrop matters  
When you are no one to embody  
All the hottest days  
Will turn to rain storms  
War begins  
666 you can't ever stop them  
666 you can't ever stop them  
You can't ever stop them  
Cause Satan is always happy  
[Spell: Ugha-shaka-ugha-shaka-umph]

Find a shelter to protect yourself,  
Leave this burning city  
Forget about your family and friends  
Now they all are zombies

Run for your life  
Run for your life  
Oh-oh  
You can not hide  
You can not hide  
Oh-oh  
Run for your life  
Run for your life  
Oh-oh  
You can not hide  
You can not hide

They want to suck your blood  
And eat your brain

Your beating heart begins to  
Fade

# Make some fuss

Fear is a fiction  
A way to keep you caring  
So stop your empty talks  
Try to feel the cherish  
Expanding from my heart  
Filling space around us  
This room now is heated  
With the lovers fragrance

Chill out babe  
And take my love  
Seize the moment of our fame  
Let's make some fuss

Blow up your affliction  
With my explosive tender  
Play a tricky dirty game girl  
Force me to surrender  
To your flaming kiss  
Melting down my neck  
Show me your inner sinner  
There is no way back

Chill out babe  
And take my love  
Seize the moment of our fame  
Let's make some fuss

Fair of satisfaction  
Starts with a free obsession  
Now we are related  
Inmates of lovers mansion  
So show me where the hall is  
Let me play your piano  
My fingertips remember  
How to make you mellow

# Keep them colored

We are dragons in vinyl skins  
Reveal our lairs to eternity  
And as it passes before our eyes  
We fail to capture colors

Keep them colored

As dragonflies fly away  
We rhyme our songs on a charity  
Desaturated layers  
Which form the memories of life

Keep them colored

Ants under a magnifying glass  
We are a part of a forbidden experiment  
And all our humble joys in life  
Are better stored in colour

# Wild Eyes

In your wild eyes I see fire  
I feel courage in your heart  
Seven miles you've passed so far  
Oh the poor boys broken apart

Red head witch  
Holding a tarot card  
Will you tell me the reason why  
Wicked sight on a beauty's face  
Such a bitter love o' mine

In your wild eyes I see fire  
I feel courage in your heart  
Woman scent torn me apart  
I will worship you my goddess

You put a spell on me  
Tied up me inside  
Now I see you in the mirror  
Cruel bane  
Ruining my life  
Will you help me  
Break the prison  
[Of your love]

In your wild eyes I see fire  
I feel courage in your heart  
Seven miles you've passed so far  
Oh the poor boys broken apart

In your wild eyes I see fire  
I feel courage in your heart  
Woman scent torn me apart  
I will worship you my goddess

I will worship, worship  
I will worship you babe

# What have you done

Vulture faced  
Approaching the street  
Hiding from your misery  
Awaiting for the day to come  
Awaiting for the crowd to cheer you up  
Golden infant  
In the hands of selfish nurse  
Getting only what you want  
Force majeure can't pop and wash  
Greasepaint of your majesty  
But time will let it die

What have you done to yourself?  
Look back! Is everything right?  
You've sculpted king out of mud  
But your aim was to soar as kite  
How did you act last year?  
Look back! Is everything right?  
You could play a role of a doc  
But each day you suffer from blight

Filled with nonsense  
Your gently weeping head  
Aching from fake confidence  
And careless to your closest friends  
Regardless of all hands that feed and share  
Seeing your escape  
In popularity  
Stomping someone to the ground  
Just to get a mere applause  
Just to make a coin out of crowds fun

What have you done to yourself?  
Look back! Is everything right?  
You've sculpted king out of mud  
But your aim was to soar as kite  
How did you act last year?  
Look back! Is everything right?  
You could play a role of a doc  
But each day you suffer from blight
